TIARA DJERBA

TIARA DJERBA is a “marathon runner” in the TIARA wool collection. For over 17 years, a palette of 10 well-balanced neutral stock colors has been offering the demanding client a premium product at an attractive price.

The distinctive linear loop texture makes TIARA DJERBA a popular floorcovering. It not only lends a beautiful optic but also enables an efficient installation as the carpet can be cut in the tuft row.

The wool blend contains high quality wools of New Zealand (WONZ) and sturdy English wool. The result is an extremely durable loop construction with a pile weight of 1200 g/m² (35 oz/sq.yd) for the exclusive residential area.

With proper maintenance TIARA DJERBA will retain its rustic appearance over many years of use.

TIARA DJERBA features the following **exceptional characteristics:**

- Extremely durable loop construction in 10 coordinating neutral colors
- Thanks to its high pile weight of 1200g/m² (35oz/sq.yd) TIARA DJERBA not only provides warmth and comfort but also sturdiness
- High sound absorption properties and good insulation for lower heating costs
- Wool enhances the indoor air quality, it is soil resistant, flame retardant and has lasting elasticity
- The scale-like texture of wool provides a protective layer around the wool fiber which resists water drops and soil. Additionally, wool can absorb water of up to 30% of its own weight without feeling wet to the touch. Its ability to retain and release moisture during periods of high or low atmospheric humidity makes the indoor environment more comfortable
- TISCA TIARA is a voluntary member of GUT (Institute for environmentally friendly carpeting). Thus, an environmentally friendly and health conscious production as well as low odor of new carpeting is guaranteed
- TISCA TIARA is a member of WOOLS OF NEW ZEALAND. All wool products are subject to stringent testing
